

1883.

QUEENSLAND.

VITAL STATISTICS, 1882.

TWENTY-THIRD ANNUAL REPORT

BY

THE REGISTRAR-GENERAL.

Presented to both Houses of Parliament by Command.

TO THE HONOURABLE THE COLONIAL SECRETARY, SIR THOMAS MCILWRAITH, K.C.M.G.

SIR,

I have the honour to present the twenty-third Annual Report of the Vital Statistics of Queensland, containing a digest of the figures contained in tables Nos. 1 to 23, which are prepared under the superintendence of the Deputy Registrar-General, Mr. Blakeney. Annual Report.

2. The smaller tables, prepared as usual under my own direction, in connection with the accompanying observations in this Report, exhibit all essential particulars of these Vital Statistics in a condensed form. Tables in Report.

3. The preparation of the Vital Statistics for the past year has been delayed, unavoidably as far as this Department is concerned, by the difficulty of reconciling the returns of arrivals and departures received from the Collector of Customs and the Immigration Agent. Monthly returns are sent in by the sub-collectors of Customs with great regularity, but as the annual return from the Immigration Office never exactly agrees with these returns there is considerable difficulty in correcting the discrepancies. Delay in preparation of Report unavoidable.

4. After much correspondence between the offices and sub-collectors and sub-immigration agents, it is only within the last few days that we have been able to obtain a solution of the difficulty, so as to arrive at a correct estimate of the population, as shown by the number of arrivals over departures and of births over deaths.

REGISTRATION.

5. The system of civil registration, which came into operation in Great Britain in 1838, and which is now carried out in all the Australian Colonies, has proved very advantageous to the community at large. Its advantages have been well pointed out by the late Registrar-General of England. Advantages of "Registration Act of 1837."

6. Before the passing of the Act of 1837, Nonconformists could not be married by the ministers of their own denominations, all marriages being perforce celebrated in the churches of the Establishment. During the last forty-four years, in accordance with the provisions of the statute, great numbers of Roman Catholics and Nonconformists have been married in the chapels of these denominations and in the various registry offices throughout the land. In regard to celebration of marriages.

7. On

With reference to proof of date of birth.

7. On the same authority it appears, that before the passing of the Act in 1837 there was no national system in existence for proving the date of birth, and that beyond the private records often kept in family Bibles, this could only be ascertained by the parish register of baptisms kept in churches. Nearly a million births in each year are now recorded in the registers, showing the exact age of the children born, the names of parents, the place of birth, and all other necessary particulars.

As to records of deaths.

8. In the same way the deaths, with their causes, and names, occupations, and ages of the parents, as many as half a million annually, are recorded under the present system of registration in England and Wales. Previous to 1838, the only approach to this careful system was the record of burials kept by ministers of the Established Church. Very careful methods for securing accuracy, with safeguards against errors and frauds, are established under the provisions of the statute, and the public have access to the civil registers by means of alphabetical indices; so that the utmost facilities exist for ascertaining full particulars of marriages, births, and deaths, in all families, and on payment of small fees certified copies under the seal of the registry offices are procurable by the public. The advantages thus secured are so palpable as to excite surprise that such a system has only come into existence within the period of 44 years.

Registration carried out more easily in new countries.

9. New countries have many advantages in carrying out the English system of registration as thus established, and there is probably no other country where this system is more perfectly carried into effect than in the colonies of Australia. This has been admitted by the highest home authorities in referring to the Vital Statistics of this part of the world.

Alphabetical Indices to Registers kept, and provision made for certified copies of entries, searches, &c.

10. All our registry offices in Queensland, in town and country, are provided with alphabetical indices. Certified copies of entries of marriages, births, and deaths are provided for under the Acts, 19 Vic. No. 34, 28 Vic. No. 15, and 40 Vic. No. 13. Searches and late registrations are provided for under the same statutes, with the payments of fees as prescribed.

Fees. 11. Country registrars receive the fees for searches and certified copies of entries for their own benefit, as well as the marriage fees, but the latter only belong to the Registrar-General, or the Deputy Registrar in the Metropolitan District. Besides their fees, the country registrars are paid from the Treasury three shillings for each registration. The amounts paid to these officers during the past year are seen as follows :—

| | | | £ | s. | d. | | | | £ | s. | d. | |

12. The registration fees paid to Revenue by the General Registry Office in Brisbane, during the year, are as follows:—

| | |
|--|------------|
| Certified copies of entries, births, deaths, and marriages, as provided in the Statutes 19 Vic. No. 34 and 28 Vic. No. 15—479, at 2s. each | £47 18 0 |
| Certified copies of entries under " <i>Friendly Societies Act</i> ," 40 Vic. No. 13—6, at 1s. each | 0 6 0 |
| Searches, births, and deaths—85, at 5s. each | 21 5 0 |
| " marriages—50, at 2s. | 5 0 0 |
| Copies of sundry documents, at per folio | 0 4 6 |
| Fines for late registrations of births under 31 Vic. No. 7—356, at 2s. 6d. each | 44 10 0 |
| | £119 3 6 |
| Collected for postage | 1 10 4 |
| Total collections | £120 13 10 |

13. Our registers have received an addition of 16,860 names during the year 1882. These include 4,068 persons married, 8,518 births, and 4,274 deaths. The persons married have been 1 to 58 living estimated on the mean population, the births 1 to 28 living, and the deaths 1 to 56 living. To explain this more exactly, the marriage, birth, and death rates have been as follows:—Marriage-rate, persons, 17·12 per thousand; birth-rate, 35·85 per thousand; death-rate, 17·99 per thousand. The number of names upon the Register of the colony in 1882 is 211,489, including persons married and births and deaths recorded.

POPULATION.

14. The estimated number of people in Queensland in December, 1882, was 248,255, consisting of 145,592 males and 102,663 females.

15. The mean population, which is one-half of the numbers as estimated at the beginning and end of the year added together, is used, unless otherwise shown, for calculating rates of marriages, births, and deaths. The following table shows the estimated population and estimated mean population for the year 1882:—

| | | |
|---|----------|----------|
| A. | | |
| ESTIMATED POPULATION to 31st December, 1882. | | |
| Males. | Females. | Persons. |
| 145,592 | 102,663 | 248,255 |
| ESTIMATED MEAN POPULATION to 31st December, 1882. | | |
| Males. | Females. | Persons. |
| 139,248 | 98,363 | 237,611 |

16. The increase of population during the past year has amounted to 21,287. The increase during the former year, 1881, was 11,914. During the decennium ending 1882 the increases have been as follows:—

| | | | |
|--------|-----------|--------|-----------|
| Years. | Increase. | Years. | Increase. |
| 1873 | 13,137 | 1878 | 7,426 |
| 1874 | 16,827 | 1879 | 7,341 |
| 1875 | 17,771 | 1880 | 8,226 |
| 1876 | 15,572* | 1881 | 11,914 |
| 1877 | 15,984 | 1882 | 21,287 |

* The actual increase for the year 1876 was 15,572, though, in order to allow for supposed loss in the enumeration of the Northern Goldfields, it was necessary to show the increase as 5,812.—See Report on Vital Statistics, 1876, pages 4 and 5.

17. It will be seen that the average increase in the years 1878 to 1880 was less than half that of the quinquennium from 1873 to 1877, but that during the last two years the average has been greater than in the first half of the decennium, and that during the last year, 1882, the increase has been nearly double that of the former year.

18. The increase in population is due to excess of births over deaths, and of immigration over emigration by sea. Generally the increase is chiefly attributable to the latter source. The natural increases and the immigration increases during the last ten years are seen follows :—

| Years. | Natural Increase, or excess of Births over Deaths. | Immigration Increase, or excess of Immigration over Emigration. | Total Increase. |
|--------|--|---|-----------------|
| 1873 | 3,470 | 9,667 | 13,137 |
| 1874 | 3,589 | 13,238 | 16,827 |
| 1875 | 2,602 | 15,169 | 17,771 |
| 1876 | 3,436 | 12,136 | 15,572 |
| 1877 | 3,796 | 12,188 | 15,984 |
| 1878 | 3,177 | 4,249 | 7,426 |
| 1879 | 4,663 | 2,678 | 7,341 |
| 1880 | 5,179 | 3,047 | 8,226 |
| 1881 | 4,900 | 7,014 | 11,914 |
| 1882 | 4,244 | 17,043 | 21,287 |

19. The immigration for the year 1882 has consisted of 15,098 Europeans, 1,937 Polynesians, and 8 Chinese.

20. The following Table B. shows the increase in each quarter of the year 1882 from excess of births over deaths and from excess of arrivals over departures by sea.

B.

SHOWING INCREASE to POPULATION in 1882, by EXCESS of BIRTHS over DEATHS, and IMMIGRATION over EMIGRATION by SEA, including places beyond the Australian Colonies, in each Quarter of the Year 1882.

| | Males. | Females. | Persons. | Natural Increase. | Increase resulting from difference between Immigration and Emigration by Sea. |
|---|---------|----------|----------|-------------------|---|
| FIRST QUARTER. | | | | | |
| Estimated Population on the 1st January, 1882 | 132,904 | 94,064 | 226,968 | | |
| Increase by excess of Births over Deaths during the Quarter | 281 | 539 | 820 | 820 | |
| Increase by excess of Immigration over Emigration by Sea during the Quarter | 1,429 | 754 | 2,183 | | 2,183 |
| POPULATION ON THE 31ST MARCH | 134,614 | 95,357 | 229,971 | | |
| INCREASE OF POPULATION DURING THE QUARTER | 1,710 | 1,293 | 3,003 | | |
| SECOND QUARTER. | | | | | |
| Population on the 1st April | 134,614 | 95,357 | 229,971 | | |
| Increase by excess of Births over Deaths during the Quarter | 423 | 654 | 1,077 | 1,077 | |
| Increase by excess of Immigration over Emigration by Sea during the Quarter | 3,368 | 1,605 | 4,973 | | 4,973 |
| POPULATION ON THE 30TH JUNE | 138,405 | 97,616 | 236,021 | | |
| INCREASE OF POPULATION DURING THE QUARTER | 3,791 | 2,259 | 6,050 | | |
| THIRD QUARTER. | | | | | |
| Population on the 1st July | 138,405 | 97,616 | 236,021 | | |
| Increase by excess of Births over Deaths during the Quarter | 517 | 805 | 1,322 | 1,322 | |
| Increase by excess of Immigration over Emigration by Sea during the Quarter | 2,985 | 1,873 | 4,858 | | 4,858 |
| POPULATION ON THE 30TH SEPTEMBER | 141,907 | 100,294 | 242,201 | | |
| INCREASE OF POPULATION DURING THE QUARTER | 3,502 | 2,678 | 6,180 | | |
| FOURTH QUARTER. | | | | | |
| Population on the 1st October | 141,907 | 100,294 | 242,201 | | |
| Increase by excess of Births over Deaths during the Quarter | 376 | 649 | 1,025 | 1,025 | |
| Increase by excess of Immigration over Emigration by Sea during the Quarter | 3,309 | 1,720 | 5,029 | | 5,029 |
| POPULATION ON THE 31ST DECEMBER | 145,592 | 102,663 | 248,255 | | |
| INCREASE OF POPULATION DURING THE QUARTER | 3,685 | 2,369 | 6,054 | | |
| INCREASE OF POPULATION DURING THE YEAR | 12,688 | 8,599 | 21,287 | 4,244 | 17,043 |

21. The total increase of population for the year under review consisted of 12,688 males and 8,599 females.

22. The

22. The rate of total increase for the year was 9·38 per cent. of the total estimated population to 31st December, 1881. The rate of male increase was 5·59 per cent. on the total population of 1881, and 9·54 per cent. upon the number of males living. The rate of female increase was 3·79 per cent. upon the total population, and 9·14 per cent. on the number of females living in the year.

| | | Total Increase, 1882. | Ratio per cent. of Increase over number of Males and Females living, as estimated to 31st December, 1881. | Ratio per cent. of Increase over the whole Population, as estimated to 31st December, 1881. | Males and females. |
|---------|-----|-----------------------|---|---|--------------------|
| Males | .. | 12,688 | 9·54 | 5·59 | |
| Females | ... | 8,599 | 9·14 | 3·79 | |
| | | — 21,287 | | — 9·38 | |

23. The numbers and proportions for the former year are seen as follows :—

| | | Total Increase, 1881. | Ratio per cent. of Increase over number of Males and Females living, as estimated to 31st December, 1880. | Ratio per cent. of Increase over the whole Population, as estimated to 31st December, 1880. | |
|---------|-----|-----------------------|---|---|--|
| Males | ... | 6,641 | 4·95 | 2·94 | |
| Females | ... | 5,273 | 5·74 | 2·33 | |
| | | — 11,914 | | — 5·27 | |

24. The natural and immigration increase in the year 1882, with the proportions of males and females, will be plainly seen, as follows :—

NATURAL AND IMMIGRATION INCREASE, 1882.

| | | Natural Increase, or excess of Births over Deaths in 1882. | Ratio per cent. of Natural Increase in 1882 over the number of Males and Females living, as estimated to 31st December, 1881. | Ratio per cent. of Natural Increase in 1882 over the whole Population, as estimated to 31st December, 1881. | |
|---------|-----|---|---|---|--|
| Males | ... | 1,597 | 1·20 | 0·70 | |
| Females | ... | 2,647 | 2·81 | 1·17 | |
| | | — 4,244 | | — 1·87 | |
| | | Immigration Increase, or excess of Immigration over Emigration in 1882. | Ratio per cent. of Immigration Increase in 1882 over the number of Males and Females living, as estimated to 31st December, 1881. | Ratio per cent. of Immigration Increase in 1882 over the whole Population, as estimated to 31st December, 1881. | |
| Males | ... | 11,091 | 8·34 | 4·89 | |
| Females | ... | 5,952 | 6·33 | 2·62 | |
| | | — 17,043 | | — 7·51 | |
| | | — 21,287 | | — 9·38 | |

25. The natural and immigration increases for the former year were as follows :—

NATURAL AND IMMIGRATION INCREASE, 1881.

| | | Natural Increase, or excess of Births over Deaths in 1881. | Ratio per cent. of Natural Increase in 1881 over the number of Males and Females living, as estimated to 31st December, 1880. | Ratio per cent. of Natural Increase in 1881 over the whole Population, as estimated to 31st December, 1880. | |
|---------|-----|---|---|---|--|
| Males | ... | 2,087 | 1·55 | 0·92 | |
| Females | ... | 2,813 | 9·06 | 1·25 | |
| | | — 4,900 | | — 2·17 | |
| | | Immigration Increase, or excess of Immigration over Emigration in 1881. | Ratio per cent. of Immigration Increase in 1881 over the number of Males and Females living, as estimated to 31st December, 1880. | Ratio per cent. of Immigration Increase in 1881 over the whole Population, as estimated to 31st December, 1880. | |
| Males | ... | 4,554 | 3·32 | 2·01 | |
| Females | ... | 2,460 | 0·27 | 1·09 | |
| | | — 7,014 | | — 3·10 | |
| | | — 11,914 | | — 5·27 | |

26. It

Ratio of total increase.

26. It will be seen from the above figures and proportions for the two years that the rate of total increase in 1882 has approached to twice that of the former year, viz., 9·38 as against 5·27. The natural increase of 1882 has been less than that of the former year, but the immigration increase of this last year has been considerably more than double that of 1881, the rates being 7·51 in 1882 against 3·10 in the former year.

Ratio of female natural increase greater than that of males.

27. In looking at the ratio of natural increase of males and females over the number of males and females living, it must be borne in mind that the births of males and females in all communities are nearly equal, and the small proportion of females in Queensland makes the ratio of female natural increase considerably larger than that of males.

28. It is not so easy to account for the fact that the ratio of natural increase of females over the whole population is greater than that of males, but this is found to be the case in all these comparisons from year to year.

Male and female immigration increase.

29. The ratio of immigration increase of males is unfortunately always largely in excess of that of females, and in the two years now in comparison it will be seen that the proportion of the increase of males has been nearly double that of females.

European, Polynesian, and Chinese immigration.

30. The immigration increase during the year 1882 has been made up of 15,098 Europeans, 1,937 Polynesians, and 8 Chinese in excess of those leaving the colony. This is seen for the last two years in the following table :—

C.

SHOWING INCREASE to POPULATION from excess of IMMIGRATION over EMIGRATION by Sea, for the Years 1881 and 1882.

| Year. | EUROPEANS. | | | Chinese (nearly all Males). | Polynesians. | Totals. |
|-------|--|----------|----------|-----------------------------------|--------------|---------|
| | Males. | Females. | Persons. | | | |
| 1881 | 3,603 | 2,305 | 5,908 | ... | ... | 5,908 |
| | ... | ... | ... | ... | 1,600 | 1,600 |
| | Less Decrease, Chinese | | | 494 | ... | 7,508 |
| | Total Increase by Immigration over Emigration, during 1881 | | | ... | ... | 494 |
| 1882 | 9,413 | 5,685 | 15,098 | ... | ... | 15,098 |
| | ... | ... | ... | ... | * 1,937 | 1,937 |
| | ... | ... | ... | † 8 | ... | 8 |
| | Total Increase by Immigration over Emigration, during 1882 | | | ... | ... | 17,043 |

* 265 of these are Females.

† 2 of these are Females.

Australian immigration and emigration by sea.

31. The Australian immigration and emigration by sea is seen in the following tables :—

D.

ARRIVALS by SEA, in QUEENSLAND, from the other AUSTRALASIAN COLONIES, in EACH QUARTER of the YEAR 1832.

| QUARTER. | WHENCE. | ARRIVALS. | | | | | | | | | | | | | | | | | | | | | | | | | | |

SUMMARY TABLE showing ARRIVALS and DEPARTURES by SEA, MALES and FEMALES, between QUEENSLAND and the other AUSTRALASIAN COLONIES during the Year 1882.

| | Males. | Females. | Persons. |
|------------------------------|--------|----------|----------|
| Total Number of Arrivals ... | 7,093 | 2,510 | 9,603 |
| Ditto „ Departures ... | 5,173 | 2,152 | 7,325 |
| Excess of Arrivals ... | 1,920 | 358 | 2,278 |

32. The summary at the foot of Table E shows that the excess of Australian arrivals over departures amounted to 2,278 persons. Of these 1,920 were males, and only 358 were females. The greatest number of arrivals was in the second and third quarters of the year. The departures occurred chiefly in the first and fourth quarters.

33. Of the whole number arriving in Queensland from other parts of Australia, 9,553 came from New South Wales, the remainder having numbered only 50 persons.

34. *The balance of intercolonial immigration by sea* again shows an increase: during the year 1882 it has been 592 in excess of the previous year, while in 1881 it was 1,514 more than in 1880. Balance of intercolonial immigration.

35. *The balance of total immigration over emigration by sea* has been always in our favour, excepting only in the year 1869, when the emigration by sea exceeded the immigration by 423 persons. As there appears still to be a very general impression that other colonies are gainers by Queensland immigration, it may be well to repeat the figures showing how erroneous such an impression has been. The following figures exhibit the ratio of the balance of immigration by sea in favour of Queensland during the last twenty-one years:— Balance of total immigration.

| Years. | Rate per cent. of Immigration over Emigration by Sea. | Years. | Rate per cent. of Immigration over Emigration by Sea. |
|--------|---|--------|---|
| 1862 | 28.53 | 1873 | 7.24 |
| 1863 | 30.37 | 1874 | 9.02 |
| 1864 | 17.78 | 1875 | 9.28 |
| 1865 | 16.17 | 1876 | 6.69 |
| 1866 | 7.55 | 1877 | 6.51 |
| 1867 | 0.95 | 1878 | 2.09 |
| 1868 | 4.29 | 1879 | 1.27 |
| 1869 | * | 1880 | 1.40 |
| 1870 | 2.19 | 1881 | 3.10 |
| 1871 | 2.91 | 1882 | 7.51 |
| 1872 | 4.06 | | |

* Balance against 423.

36. The following table shows the excesses and proportions of immigration over emigration by sea in twenty-one years, 1862 to 1882. It shows also the excesses and the proportions of births over deaths:— Excess during twenty-one years.

F.

SHOWING EXCESS of BIRTHS over DEATHS and of IMMIGRATION over EMIGRATION by SEA.—RETURN for TWENTY-ONE YEARS, 1862 to 1882.

| Year. | Population on the 31st December. | EXCESS OF BIRTHS OVER DEATHS. | | | | Centesimal ratio of natural increase in Population of each year arising from excess of Births over Deaths. | Year. | EXCESS OF IMMIGRATION OVER EMIGRATION BY SEA. | | | | Centesimal ratio of Immigration increase in Population of each year arising from excess of Immigration over Emigration. | Total increase to Population to 31st December. | Centesimal ratio to total Population to 31st December. | Centesimal ratio of total increase in Population of each year. | Proportion of Females to Males in total increase. |

NOTE.—* In addition to the increase by Births over Deaths, and Immigration over Emigration, the Census taken 1st January, 1864, showed a further addition of 1,923, being the difference between the estimated population and that ascertained by Census.

† In this year also the Census taken added 630 to the estimated population.

‡ In this year also the Census taken added 2,300 to the estimated population.

§ In this year there was an excess of departures of 423.

|| The increase here shown is after deducting the difference between estimated population and the smaller number as ascertained by Census. The actual increase is 11,914, consisting of 4,900 Natural increase and 7,014 Immigration increase.

¶ In estimating the Population for this year, on the basis of the Census taken during 1881, it was found that there was an increase in Female population of 2,203 and a decrease in Male population of 1,312, consequently the total increase of 891 would be all Females.

Number and proportions of Europeans, Chinese, and Polynesians in the whole population.

37. Table G shows the estimated European and Australian born, the Chinese and the Polynesian population to the end of the year 1882 :—

G.

ESTIMATED NUMBER and PROPORTIONS of EUROPEANS, CHINESE, and POLYNESIANS in the Population of Queensland, December 31st, 1882.

| | Males. | Females. | Persons. | Males. | Females. | Persons. | Percentage to Total Estimated Population. |
|---|---------|----------|----------|--------|----------|----------|---|
| Estimated European and Australian-born Population ... | 126,629 | 101,929 | 228,558 | ... | ... | ... | 92·06 |
| „ Chinese Population | 10,858 | 36 | 10,894 | ... | ... | ... | 4·39 |
| „ Polynesian ditto | 8,105 | 698 | 8,803 | ... | ... | ... | 3·55 |
| Total of each Sex | 145,592 | 102,663 | 248,255 | ... | ... | ... | 100·00 |
| Total Estimated Population, 1882 | 145,592 | 102,663 | 248,255 | | | | |

38. The European and Australian born were in the proportion of 92·06 to the whole estimated population of the colony; the proportion of Chinese was 4·39, and that of the Polynesians 3·55. The proportions in 1880, 1881, and 1882 are seen as follows :—

| | 1880. | 1881. | 1882. |
|-----------------------------|-------|-------|-------|
| European and Australian ... | 91·64 | 91·86 | 92·06 |
| Chinese | 5·63 | 4·83 | 4·39 |
| Polynesians | 2·73 | 3·31 | 3·55 |

39. It will be seen that, though we have had an unusually large European immigration during the year 1882, the proportion of Polynesians is larger than in the two former years. The European element is slightly on the increase, and that of the Chinese has gradually decreased in proportion to population during the three years.

PROPORTIONS OF THE SEXES.

Excess of males over females.

40. The males and females in the population of Queensland are in great disproportion to each other, the males greatly preponderating. This arises partly from the presence of numbers of colored laborers who are not generally accompanied by their wives, but it is also due to the much larger number of the male sex in our immigration, more especially that by way of the other colonies.

Proportions of sexes in immigration from Europe.

41. In former reports it has been shown how many females there have been to one hundred males within the last ten or twelve years in the general immigration to the colony, including all who arrive from the other colonies*, and the proportions of the sexes in the immigration, exclusive of Chinese and Polynesians. The following figures show the proportions of the sexes in our immigration exclusively from Europe between the years 1873 and 1882 :—

EUROPEAN IMMIGRATION.

| | Males. | Females. | Persons. | Proportion of Females to each 100 Males. |
|-------------|--------|----------|----------|--|
| 1873 | 4,289 | 3,310 | 7,599 | 77·17 |
| 1874 | 5,598 | 3,983 | 9,581 | 71·15 |
| 1875 | 3,327 | 2,544 | 5,871 | 76·47 |
| 1876 | 3,518 | 2,309 | 5,827 | 65·63 |
| 1877 | 3,643 | 2,569 | 6,212 | 70·52 |
| 1878 | 4,254 | 2,904 | 7,158 | 68·27 |
| 1879 | 2,418 | 1,668 | 4,086 | 68·98 |
| 1880 | 1,611 | 1,793 | 3,404 | 111·30 |
| 1881 | 2,219 | 2,070 | 4,289 | 93·29 |
| 1882 | 7,175 | 5,481 | 12,656 | 76·39 |

* In the Report for 1881, page xiii., the figures of the whole immigration were inadvertently given as European immigration.

42. It will be observed that in the last three years the proportion of females in our European immigration was increased. The average proportion of females introduced from Europe in 1880 to 1882 was 84·91 to every one hundred males. In 1880 there was an excess of females from Europe, the proportion being 111·30 females to each 100 males, yet in the total immigration of that year the proportion was only 43·10 females. The large difference is accounted for by the fact that among the colored races there are few females, and in the immigration from the other colonies a very large proportion are males.

43. The following figures give numbers and proportions of females to each 100 males of total immigration from 1870 to 1882, and of intercolonial immigration for six years from 1877 to 1882 :—

TOTAL IMMIGRATION.

| | | | Persons. | | Males. | | Females. | | Proportion of Females to every 100 Males. |
|------|-----|-----|----------|-----|--------|-----|----------|-----|--|

In intercolonial
immigration.

44. The population of Queensland in 1882 shows 70·51 females inclusive, and 80·49 exclusive, of Chinese and Polynesians to each one hundred males; these proportions being calculated not on the mean but on the whole estimated population to December, 1882.

45. In long-settled communities the births of females and males are nearly equal. It is ascertained that in Europe generally the births are in the proportion of 106 males to 100 females.

Ratio of births of
females to males in
settled communities.

46. The proportions of the sexes in England and Wales and in the principal Australian Colonies in 1880 were as follows :—

| | | | | | | | To 100 Males. |
|----------------------------|-----|-----|-----|-----|-----|-----|---------------|
| England and Wales | ... | ... | ... | ... | ... | ... | 105 |
| South Australia | ... | ... | ... | ... | ... | ... | 91 |
| Victoria | ... | ... | ... | ... | ... | ... | 83 |
| New South Wales (nearly) | ... | ... | ... | ... | ... | ... | 79 |
| Queensland (a little over) | ... | ... | ... | ... | ... | ... | 67 |

Proportions of the
sexes in England
and Wales and the
principal Australian
Colonies.

47. The census of 1881 showed that the sexes in Victoria had become more nearly equal than in any previous period, or than was supposed before the enumeration, the proportion being 97·5 females to 100 males. The proportion, as shown by the census of 1881, in Queensland was 70·38 females to every one hundred males.

In Victoria.

48. In

Mean population, inclusive and exclusive of colored races.

48. In the subsequent portions of this Report the calculations showing rates of marriages, births, and deaths, unless otherwise stated, are based upon the estimated population in the middle of the year. The mean population, exclusive of the colored races, in 1882 in Queensland was 218,525; with Chinese and Polynesians included the mean population for the year was 237,611. The rates are shown, first, exclusively of Chinese and Polynesians, so as to exhibit a fair comparison with the other Australian colonies in which the proportion of colored races is comparatively insignificant; and, secondly, including the whole estimated population in Queensland, Europeans, Chinese, and Polynesians.

APPENDICES.

Appendices.

49. Appendix A contains a table showing a synopsis of the Vital Statistics of Queensland from 1856 to 1882, inclusive.

The general tables in Appendix A are as follows:—

| | |
|---|------------------|
| Immigration by sea | Table I. |
| Emigration by sea | „ I., continued. |
| <i>Estimated population to December, 1882, and estimated mean population; also number of marriages, births, and deaths</i> | „ II. |
| <i>Quarterly registration of births</i> | „ III. |
| <i>Marriages registered in each registry district</i> | „ IV. |
| <i>Nationality of husbands and wives</i> | „ V. |
| <i>Ages of husbands and wives when married</i> | „ VI. |
| <i>Quarterly registration of deaths</i> | „ VII. |
| <i>Deaths of Children under five years</i> | „ VIII. |
| <i>Nationality of all persons whose deaths were registered—males and females</i> | „ IX. |
| <i>Occupations of those who have died</i> | „ X. |
| <i>Causes of deaths—order of their fatality</i> | „ XI. |
| <i>Males—causes of deaths at different periods of life</i> | „ XII. |
| <i>Females—ditto ditto</i> | „ XIII. |
| <i>Males and females together—ditto ditto</i> | „ XIV. |
| <i>Causes of deaths of all persons as registered in each separate month</i> | „ XV. |
| <i>Males—causes of deaths in each district</i> | „ XVI. |
| <i>Females—ditto ditto</i> | „ XVII. |
| <i>Males and females together—ditto ditto</i> | „ XVIII. |
| <i>Causes of deaths of males—Brisbane District</i> | „ XIX. |
| <i>Causes of deaths of females—Brisbane District</i> | „ XX. |
| <i>Causes of deaths of persons at different periods of life—Brisbane District</i> | „ XXI. |
| <i>Causes of deaths, males and females, in each month of the year—Brisbane District</i> | „ XXII. |
| <i>Causes of deaths, males and females, in totals of orders</i> | „ XXIII. |

50. The

50. Appendix B is an alphabetical list of the Registry Districts, with names of Registrars.

51. Appendix C is the report of the Meteorological Observer, with tables containing much useful information. This useful document cannot always be obtained in time for publication with the first issue of this Report on the Vital Statistics, not being prepared under the direction of this Department.

MARRIAGES.

52. There have been four thousand and sixty-eight names added to the Marriages marriage registers during the year 1882. This is 662 more than in the previous year, when the number was 3,406.

53. *The marriage-rate* for the year, exclusive of Chinese and Polynesians, Rates. was 18·51. The rate in the former year, calculated in the same way, was 16·73. The rate on the whole population, as estimated in the middle of the year, was 17·12. This is the highest marriage-rate known in the colony since 1875.

54. The number of marriages in proportion to the population is regarded as certainly indicative of increased or diminished general prosperity; and in England this is found to be an unvarying gauge by which the commercial condition of the community may be determined. This may not be so certain in its application in other parts of the world, but the test may be relied on generally in the Australian colonies, and high marriage-rates in Queensland during the last two years faithfully reflect the considerable measure of prosperity which has recently marked our history, and has continued in an increased degree during the last twelve months.

55. The average marriage-rates of the Australian colonies for sixteen years, 1865-1880, are given by Mr. Hayter in the "Victorian Year Book" for 1881-2 as follows:—

Per thousand of Mean Population,
Persons Married.

| | | | | | | |
|-------------------|-----|-----|-----|-----|-----|-------|
| Queensland | ... | ... | ... | ... | ... | 17·38 |
| New Zealand | ... | ... | ... | ... | ... | 16·72 |
| South Australia | ... | ... | ... | ... | ... | 16·12 |
| New South Wales | ... | ... | ... | ... | ... | 15·70 |
| Western Australia | ... | ... | ... | ... | ... | 13·54 |
| Tasmania | ... | ... | ... | ... | ... | 13·42 |
| Victoria | ... | ... | ... | ... | ... | 13·04 |

56. Queensland would show considerably better in this comparison were the marriage-rates estimated on population exclusive of Chinese and Polynesians.

Marriage-rates in
Queensland exclusive
of colored races.

57. The marriage-rates in Victoria and New South Wales in the year 1882, which have been kindly wired to us by request, were as follows:—

Marriage-rates in
other colonies, 1882.

| | | | | | | |
|-----------------|-----|-----|-----|-----|-----|-------|
| Victoria | ... | ... | ... | ... | ... | 14·17 |
| New South Wales | ... | ... | ... | ... | ... | 17·43 |

58. The Queensland marriage-rate, including Chinese and Polynesians, was, as before shown, 17·12.

59. The marriage-rate for Australasia, including New Zealand and Tasmania, the mean of eight years from 1873 to 1880, is given in the "Victorian Year Book" as 14·44.

60. The

In European States.

60. The Registrar-General of England gives the marriage-rate of European States as follows :—

| | | | | | | Persons Married per thousand. |
|-------------------|-----|-----|-----|-----|-----|-------------------------------|
| Prussia | ... | ... | ... | ... | ... | 15·6 |
| German Empire | ... | ... | ... | ... | ... | 15·4 |
| Netherlands | ... | ... | ... | ... | ... | 15·4 |
| England and Wales | ... | ... | ... | ... | ... | 15·3 |
| France | ... | ... | ... | ... | ... | 15·1 |
| Austria | ... | ... | ... | ... | ... | 15·0 |
| Denmark | ... | ... | ... | ... | ... | 14·7 |
| Switzerland | ... | ... | ... | ... | ... | 14·7 |
| Italy | ... | ... | ... | ... | ... | 14·2 |
| Belgium | ... | ... | ... | ... | ... | 13·4 |
| Sweden | ... | ... | ... | ... | ... | 12·9 |

Rates of marriage
by number of
marriageable men.

61. In communities existing under such abnormal conditions as obtain to a greater or less degree in all the Australian colonies, as compared to those in older countries, it is contended that the true marriage-rate is found by the number of marriages in proportion to the number of marriageable men, that is, of bachelors over twenty and of all widowers, exclusive of colored races. As thus determined the marriage-rate in Queensland shows well by comparison.

62. As found by the census of 1881, the number of marriageable males, exclusive of Chinese and Polynesians, was 28,417. The marriages, exclusive of the colored people, were 1,685. The marriage-rate as thus determined was 59·30. The marriage-rate in Victoria in 1881, tried in the same way, was given in the last received edition of the "Victorian Year Book" as 52·43 per thousand.*

63. The number of marriageable females, exclusive of Chinese and Polynesians, as found at the last census, was 17,497, including girls from 15 to 20 years of age. There were 1,700 white women married in the census year 1881, 3 colored women, and 18 colored men. Though the number of marriageable men was 28,417, and that of women married was only 1,700, yet the number of women married in that year was only about one-tenth of those who by age are said to be marriageable; therefore it would be contended that the difference was so great between the numbers that we need not take the fewness of the women into account in this mode of estimating marriage-rates, for if a greater number of men had been disposed to marry they had opportunity enough among the nine-tenths of women who remained unmarried. At least it would appear that the supply of unmarried females from 15 upwards was equal to the demand for wives. Is it not evident, unless the disparity were even greater than it is in Queensland, that the number of marriageable women may be left out of the reckoning in this method of calculating marriage-rates, this being determined solely by the number of marriageable men? But, on the contrary, it may be asked, would not the presence of a larger number of really marriageable women, that is of single females over 20 years of age, prove an incentive to matrimony among marriageable men? To take the figures of the census year 1881, there were 28 single men to 17 marriageable females, and this was including girls of from 15 to 20 who should not be married. These numbered 7,959 persons in the census year, leaving only 9,538 properly marriageable females to the 28,417 marriageable men, or about 1 in 3. There can be no question but that society must be in a happier condition where the sexes are nearly equal, following the all but universal law of an equal number of births of males and females.

64 The following table exhibits the estimated population and estimated mean population, males and females; the proportion of females to every 100 males; together with the number of marriages and of persons married per mean population in England and Wales, Victoria, New South Wales, South Australia, and Queensland in the years from 1873 to 1882 inclusive :—

* The above appear to be corrected figures, the rate given in the edition of 1881-2 having been 52·19.

H.

COMPARATIVE TABLE showing POPULATION to the end of the Year, NUMBER of MALES and FEMALES; ESTIMATED MEAN POPULATION, NUMBER of MALES and FEMALES; PROPORTION of FEMALES to 100 MALES; NUMBER of MARRIAGES; PERSONS MARRIED per 1,000 of MEAN POPULATION in ENGLAND and WALES, VICTORIA, NEW SOUTH WALES, SOUTH AUSTRALIA, and QUEENSLAND—RETURN for TEN YEARS.

| Year. | Country. | ESTIMATED POPULATION AT END OF THE YEAR. | | | ESTIMATED MEAN POPULATION. | | | Proportion of Females to each 100 Males of the Mean Population. | Number of Marriages Registered during the Year. | NUMBER TO EVERY 1,000 OF THE MEAN POPULATION. | |

* Census taken, 3rd April, 1881.

† The population of England and Wales and that of Victoria having been corrected for the years 1872 to 1881 inclusive, in accordance with the results ascertained by the Census of 1881, this table has been revised in accordance with the figures published in the 43rd Annual Report of Births, Deaths, and Marriages in England, and in the case of Victoria from those published in the Victorian Year Book of 1881.

‡ The corrected estimate made in consequence of the results of Census taken 3rd April, 1881, is 126,263 males, 88,791 females, and 215,054 persons.—Vide remarks pages IV. & V. of Report for 1881.

§ Necessary returns not received.

NOTE.—No data as to the population of England and Wales at the end of each year, excepting Census year. The mean populations of Victoria, New South Wales, South Australia, and Queensland, have been arrived at by adding together the numbers at the beginning and end of the years respectively, and dividing the sum.

65. The marriages among Chinese and Polynesians numbered twenty-three, counting persons married. Of these, fourteen male Chinese were married as follows :—One to a woman native of Queensland; one to a native of New South Wales; six to women born in England or Wales; two to Scotch; one to Irish; one to a Dane and two to natives of China. Four Polynesian men were married, one to a native of England, and three to natives of Polynesia.

Forms of marriage.

66. *Forms of Marriage.*—The marriages as celebrated by Ministers of Religion, by District Registrars, and under “*The Justices’ Marrying Act*,” for the years 1881 and 1882, are shown in the subjoined table :—

I.

COMPARATIVE TABLE showing NUMBER of MARRIAGES by each DENOMINATION for the Years 1881 and 1882, and the NUMERICAL and CENTESIMAL INCREASE or DECREASE as to each.

| Denomination. | Marriages in 1881. | Marriages in 1882. | Numerical Increase* or Decrease† in 1882. | Centesimal Increase* or Decrease† in 1882. |

| | 1,703 | 2,034 | *331 | *19·44 |

Marriages in churches.

67. It will be observed that nearly half the marriages during the past year have been celebrated by Ministers of the English and Roman Catholic churches. Those performed according to the rites of the Church of England were 517; those by Roman Catholic rites, 406. The next in the order of numbers were in the Presbyterian churches. In three only out of the fourteen denominations there was a diminution in the number of marriages performed during the year; the remainder all show an increase.

Signature of marriage registers.

68. *Signature of Marriage Registers.*—The condition of primary education is ordinarily estimated by the number of persons who sign the marriage registers by mark, and who are thus supposed to be unable to write their own names. Within the last half-century the schoolmaster has been abroad, and the condition of elementary education among the masses has been greatly improved. In the years 1841 to 1845 no less than 32·6 per cent. of men and 48·9 per cent. of women in England and Wales signed the marriage registers by mark. In 1879 this was reduced to 13·8 men, and 18·5 women. In 1880 the proportions were a little increased, being 14·0 men and 18·6 women.

69. The proportion of marksmen in Scotland is much smaller than in England.

70. In Australia the proportion of persons of both sexes signing the marriage registers by mark is much less than in England and Wales. The following figures are taken from the Australian “*Year-Book for 1881-2*” :—

| | | | | | Persons signing by Mark in every 100 Marriages in 1880. | | |
|------------------------|-----|-----|-----|-----|---|--------|-------|
| | | | | | Men. | Women. | Mean. |
| New Zealand | ... | ... | ... | ... | 2·77 | 5·38 | |
| Victoria | ... | ... | ... | ... | 4·18 | 4·09 | |
| South Australia | ... | ... | ... | ... | 5·19 | 6·81 | |
| Queensland | ... | ... | ... | ... | 5·82 | 12·09 | |
| New South Wales | ... | ... | ... | ... | 6·07 | 7·27 | |

71. The Queensland marriage registers show the exact proportions of males and females who signed by mark in the two years 1881 and 1882, as seen in the following table :—

J.

TABLE showing NUMBER of PEOPLE, MALES and FEMALES, who signed MARRIAGE CERTIFICATE by MARK, and the PROPORTION per CENT. of the TOTAL NUMBER MARRIED, for the Two YEARS, 1881 and 1882.

| Year. | Number of Marriages Celebrated. | Number of Persons who signed Marriage Certificate by Mark. | | | Proportion to each 100 Marriages. | | Proportion to each 100 Persons Married. |
|----------|---------------------------------|--|----------|----------|-----------------------------------|----------|---|
| | | Males. | Females. | Persons. | Males. | Females. | |
| 1881 ... | 1,703 | 84 | 169 | 253 | 4.93 | 9.92 | 7.43 |
| 1882 ... | 2,034 | 105 | 197 | 302 | 5.16 | 9.69 | 7.42 |

72. Queensland does not show favorably in this respect in comparison with most of the other Australian colonies ; but this is chiefly due to the large immigration, the great bulk of which consists of an ignorant class of persons. It is so far satisfactory to observe that, though the immigration has been greatly increased during the last year, the proportion of persons signing the registers by mark has decreased a little among the women, though it has increased in about the same ratio among the men.

73. The number of marriages celebrated in each Registry District in each quarter of the year 1882 will be seen in the subjoined table :—

Seasons of the year—
marriages.

| TOTAL | | | | 485 | 486 | 526 | 537 | 2,034 |

74. The greatest number of marriages in the year, as will be seen by the table, were celebrated in the last quarter, showing 537. In the third quarter there were 526 marriages, in the second 486, and in the first 485.

District of Brisbane.

75. The marriages in the Registry District of Brisbane during the year 1882 numbered 532. This was in the proportion of 26·15 per cent. to the whole number of marriages in the colony.

First marriages and re-marriages.

76. *First Marriages—Re-marriages.*—The previous civil condition of all persons married during the year, how they were married and the proportions per cent., will be seen as follows :—

77. *Ages at Marriage.*—Table VI., in Appendix A, shows the ages at which Ages at marriage. all persons were married in Queensland during the year 1882. The ages of the wives are shown at the top of each column, and the number of wives at each age is given at the foot. The ages of husbands are shown in columns to the extreme right and left. In a line with each of the ages of husbands and under each of the ages of wives is shown the number of husbands at each of the ages married to wives of certain ages. This is seen by reading the table horizontally. The table read vertically shows the number of wives at certain ages married to husbands at certain ages. Thus, the first column under the ages of wives shows that 2 girls were married at the age of 14 years; one to a man of 28, and one to a man of 23 years. The last column under the ages of wives shows that one woman was married at 58, and that the age of the husband was 58.

78. It is seen that the lowest age of females married was 14, and that the lowest age of husbands was 18. One man of 70 was married to a woman of 48, and two men of 62 married women each of them being 39 years of age. There were 359 women married who gave their ages at 21 years. The number at 20 was 141, and the number at 22 was 229.

79. *Marriages of Minors.*—The table above referred to shows that there were Marriage of minors. 42 men married at ages below 21 years. This is in the proportion of 2·06 to the whole number married.

80. There were 673 women married whose ages were given at under twenty-one years; the proportion of these to the total marriages was 33·08. The mean of this percentage of the two sexes was 17·57.

BIRTHS.

81. The number of births registered in the year 1882, exclusive of Chinese Births. and Polynesians, was 8,484. This is an increase of 286 in the number of births registered in the former year.

82. The whole of the births in the year, including those among the colored races, numbered 8,518, which was an increase of 298 in the year, the births in 1881 having numbered 8,220. The numbers and increases during the quinquennium 1878 to 1882 are seen as follows:—

| Years. | | Births. | | Increases. | | |
|--------|-----|---------|-----|------------|-----|----------------|
| 1878 | ... | 7,397 | ... | 228 | ... | 1878 over 1877 |
| 1879 | ... | 7,870 | ... | 473 | ... | 1879 „ 1878 |
| 1880 | ... | 8,196 | ... | 326 | ... | 1880 „ 1879 |
| 1881 | ... | 8,220 | ... | 24 | ... | 1881 „ 1880 |
| 1882 | ... | 8,518 | ... | 298 | ... | 1882 „ 1881 |

83. The excess of births over the total number of deaths in the year has Excess of births over deaths. been 4,244.

84. The following table shows the number of births in 1881 and 1882 in Births in districts. each of the Registry Districts in Queensland, with total increases or decreases in each, together with the number of females born to every 100 males born:—

Decreases.

85. There was a decrease in the number of births in twenty-three out of the fifty-two districts. These decreases are generally insignificant: in nineteen places they were under twenty. Those in which the decreases were equal to or in excess of twenty were, Warwick, 45; Ipswich, 28; Darling Downs East, 26; Maryborough, 20.

Increases.

86. The increases of over twenty births were, in Kennedy, 70; Gympie, 64; Caboolture, 57; Oxley, 41; Brisbane, 39; Cardwell, 37; Mackay, 36; Westwood, 33; Bundaberg, 32; Clermont, 28; Cook, 26; Townsville, 25.

87. The

87. The increases or decreases in the districts are very plainly seen in the following table:—

M.

BIRTHS—INCREASE and DECREASE in EACH REGISTRY DISTRICT in 1882.

| Registry District. | Increase. | Registry District. | Decrease. |
|---|-----------|------------------------------|-----------|
| Aramac | 6 | Balonne | 14 |
| Brisbane | 39 | Blackall | 6 |
| Bundaberg | 32 | Bowen | 4 |
| Burke | 10 | Burnett | 15 |

| Less Decreases in some Districts | 289 | | |
| NET INCREASE, 1882 | 298 | | |

88. *Birth-rate.*—The birth-rate for the year under review, exclusive of Birth-rate. Polynesians, has been 38·82 per thousand of mean population. The colored races being included, the birth-rate was 35·85. The rate in the former year, estimated on the whole mean population, was 37·19, and exclusive of Chinese and Polynesians it was 40·52.

89. The birth-rate in Queensland has had a general downward tendency since 1874. For seventeen years the rate had been high, varying from 4·0 to 4·7 per cent. on the mean population of each year.

90. The mean birth-rates for sixteen years, 1865 to 1880, in the principal Birth-rates in Australian Colonies. book," as follows:—

| | |
|------------------------------------|-------|
| New Zealand | 41·15 |
| Queensland | 40·75 |
| New South Wales | 39·22 |
| South Australia | 39·04 |
| Victoria | 36·16 |
| Western Australia (9 years) | 32·35 |
| Tasmania | 30·42 |

91. In England and Wales the birth-rate for the year 1880, as shown in the In England and Report last received, was 34·2 per thousand persons living. The rates differ con- Wales. siderably in some of the counties. The highest birth-rates appear to be in the great centres of manufacturing industries, varying in those localities from 37·5 to 43·5 per cent.

92. In the metropolitan district of Brisbane the birth-rate in the year under review was 41·68 per thousand of mean population. Within the municipality the Birth-rate in Metropolitan District. rate was 41·98, in the suburbs it was 40·87, and in the country districts it was 34·85 per thousand.

93. Seasons

Seasons of the year—
Births.

93. *Seasons of the Year.*—The greatest number of births during the year was registered in the third quarter, in which the number entered was 2,264. In the June quarter there were 2,115, in the quarter ending December there were 2,114, and in the first quarter of the year there were 2,025 births registered in the colony.

Sex.

94. *Sex.*—The males born in Queensland in 1882 numbered 4,414; the females born were 4,104. The male births were in the proportion of 3·17 to the estimated number of males living in the middle of the year, and the female births were in the ratio of 4·17 to the estimated number of females living.

95. As compared to the number of female births the males born were 107·55 to one hundred females. This is a little in excess of the ordinary proportions of births of the sexes. A tendency in the opposite direction has recently obtained in the colony, and a like lessening of the proportion of male to female births has been noticed in recent reports from the Registrar-General in England.

Illegitimate births.

96.—*Children Born out of Wedlock.*—The illegitimate births recorded during the year have numbered 375. This is 30 more than in the former year, when the number of these irregular births in the colony was 345. The proportion of illegitimate to total births in the past year was 4·40 per cent.; the ratio to the mean population of the colony was 1·58 per thousand.

In Metropolitan
District.

97. In the metropolitan district of Brisbane the children born out of wedlock numbered 131. Their proportion to the total births in the Brisbane registry district was 9·08 per cent. and 3·78 per thousand to the mean population of the district. In the previous year of 1881 the proportion of irregular births in the metropolitan district was 7·41 per cent. to the total births, and 3·23 per thousand to the mean population of the district.

In Country Districts.

98. Outside the metropolitan district in the colony the children of illegitimate birth numbered 244, which was in the proportion of 3·45 per cent. to the total births in the country and of 1·20 per thousand to the estimated mean population in country districts. In the previous year the rate beyond the Brisbane district was 3·54 per cent. to the total births and 1·28 per thousand to the mean population of the whole colony, excepting the district in and around the metropolis.

In London and in
Brisbane.

99. In London the rate of illegitimate births in 1877 was as low as 3·7 per cent. to total births. Thus it is seen that in 1882 there were nearly three times as many children born out of wedlock, in proportion to the total births, in Brisbane as in London in 1877. This is not a pleasing revelation, but it may be modified a little by the reasonable supposition that some of these births in Brisbane properly belonged to the country districts, though taking place in the metropolis.

In New Zealand and
the other Australian
Colonies.

100. In New Zealand the illegitimate births, the mean of nine years ending 1880, as given in the "Victorian Year Book," 1881-2, was only 1·94 per cent. to the total births in that country. The mean in the other Australian Colonies was, however, something higher than in Queensland.

In England and
Wales.

101. In the whole of England and Wales in 1877 the rate of illegitimate births was 4·7. In 1880 it was 4·8 to one hundred births.

Twin births and
triplets.

102. *Twin Births.*—There have been 130 twins born during the year 1882 in Queensland. The children thus coming in pairs have been 60 of them boys and 70 girls. There has been one triplet birth in the year, three males.

DEATHS.

Number of deaths—
Totals.

103. The total number of deaths registered during the past year has been 4,274. This is an increase of 954 over the number of deaths recorded in the former year of 1881. The deaths of males numbered 2,817; those of females were 1,457.

Exclusive of colored
races.

104. The deaths, exclusive of Chinese and Polynesians, were 3,517, which shows an increase of 696 over the deaths registered in 1881.

105. The increase in total deaths has been in the ratio of 28·73 per cent. to the total number of deaths in the year 1881. The increase, inclusive of the colored races, has been in the ratio of 24·67 per cent. to the total number of deaths in 1881.

106. The

106. The total deaths of females have been in the proportion only of 51·72 Females to males. to the deaths of males. The proportions to the deaths of males and females living were, males, 13·04 per thousand to the number of males living in the middle of the year; and females, 14·81 per thousand to the number of females living, estimated on the mean female population of the year.

107. *Death-rate.*—Exclusive of the deaths of Chinese and Polynesians, the Death-rate, exclusive of colored people. death-rate during the year has been 16·09 per thousand. In the former year the rate, exclusive of the deaths among colored races, was 13·91.

108. The death-rate, estimated on the whole population in the middle of the year, was 17·99 per thousand. This rate is considerably higher than that of the former year, which was 15·02. The mean death-rate of the ten years ending 1882 is 17·46 per thousand.

109. The death-rate in England and Wales, as seen in the Report of the Registrar-General for 1880, the last received, was 20·5 per thousand. The average Rate in England and Wales. death-rate for the decennium ending 1879 was 21·6 per thousand.

110. In Queensland a high death-rate is partly the consequence of our high Cause of high death-rate in Queensland. marriage and birth rates, because so large a proportion of deaths in all communities are those of children under five years old; these generally constitute as many as from 40 to 50 per cent. of total deaths. Where there are many young children, therefore, an increased death-rate from this cause must exist. It remains to be considered whether this is a sufficient reason for the death-rate generally obtaining in the colony, or if, in spite of more than an ordinary number of births, we ought not to have a lower rate of mortality.

111. The Australasian death-rates generally are lower than that of this colony. Rate as compared with that in other Australian Colonies.

112. In the last edition of Mr. Hayter's "Victorian Year Book" the following comparison is given of the mean death-rates for sixteen years ending 1880 in the colonies of Australasia:—

| | | | | | Mean Rates of Mortality. Return for Eleven Years per 1,000 of Mean Population. |
|-----------------------------|-----|-----|-----|-----|--|
| Queensland | ... | ... | ... | ... | 17·86 |
| Victoria | ... | ... | ... | ... | 15·87 |
| New South Wales | ... | ... | ... | ... | 15·59 |
| Western Australia (9 years) | ... | ... | ... | ... | 15·39 |
| Tasmania | ... | ... | ... | ... | 15·25 |
| South Australia | ... | ... | ... | ... | 15·16 |
| New Zealand | ... | ... | ... | ... | 12·38 |

113. For a number of years attention has been called in these Reports on the Vital Statistics of this colony to the heavy mortality of Polynesians in Queensland, Rates, exclusive of colored races, more favorable to Queensland. and how largely this serves to swell the general death-rate. Any comparison of the death-rates between Queensland and the other colonies should therefore be made exclusive of the colored races; and, as thus shown, even without taking into account the large number of children in Queensland, our death-rate would compare favorably with any of the other Australasian colonies, excepting only that of New Zealand.

114. As ordinarily computed and shown, the rates of mortality for ten years, Mean mortality. males and females, are given in the first of the following tables. In the second table O, the marriages, births, and deaths, with their rates, and the average rates for ten years are shown. It will be seen that the mean death-rate as thus shown, including Chinese and Polynesians, was 17·46.*

* There is some evident difference in the methods of calculating rates and mean population in some of the Australian colonies; the results, however, substantially agree.

N.

SHOWING the DEATHS, MALES and FEMALES, and their PROPORTION to TOTAL MEAN POPULATION in each YEAR.—RETURN for TEN YEARS—1873-1882.

| YEAR. | POPULATION. | | | | | | DEATHS. | | | | | | | | Proportion of Total Deaths per 1000 of Mean Population. | |

| Total for 10 Years | 30,768 | 37,482 | 35,600 | 73,082 | 21,996 | 12,030 | 34,026 | 15.79 | 37.51 | 17.46 | 39,056 | 114.78 | 105.20 | 182.84 |

Marriage, birth, and death-rate, inclusive and exclusive of colored races.

115. The rates of marriages, births, and deaths, exclusive of Chinese and Polynesians, are shown in Table P, which also shows the rates calculated in the ordinary way:—

P.

TABLE showing the NUMBER of BIRTHS and DEATHS REGISTERED, and NUMBER of PERSONS MARRIED during the Year 1882, and their RATE to the ESTIMATED MEAN POPULATION of the COLONY for the Year 1882; also, the NUMBER of BIRTHS and DEATHS REGISTERED, and PERSONS MARRIED, exclusive of CHINESE and POLYNESIANS, and their RATE to the ESTIMATED MEAN POPULATION of same Date, exclusive of CHINESE and POLYNESIANS.

| | TOTAL MEAN POPULATION AND RATES. | | | MEAN POPULATION AND RATES, EXCLUSIVE OF CHINESE AND POLYNESIANS. | | |
|------------------------------------|--|---|--|--|--|--|
| | Estimated Mean Population for the Year 1882. | Number of Births and Deaths Registered, and Number of Persons Married during the Year 1882. | Rate per 1,000 of the Mean Population for the Year 1882. | Estimated Mean Population for the Year 1882, exclusive of Chinese and Polynesians. | Number Registered, exclusive of Chinese and Polynesians. | Rate per 1,000 of the Mean Population, exclusive of Chinese and Polynesians. |
| Births | ... | 8,518 | 35.85 | ... | 8,484 | 38.82 |
| Marriages — Persons married | 237,611 | 4,068 | 17.12 | 218,526 | 4,045 | 18.51 |
| Deaths | ... | 4,274 | 17.99 | ... | 3,517 | 16.09 |

116. It will be seen that the marriage-rate, estimated in the ordinary way, in 1882, was 17.12 per thousand, but exclusive of Chinese and Polynesians in the population it was 18.51.

117. The birth-rate by the ordinary method of computation was 35.85; by the exclusive method it was 38.82. The death-rate by the usual mode of computation was 17.99, but by excluding the Chinese and Polynesians it was 16.09.

118. The table shows that the number of persons married among Chinese and Polynesians in the year was 23, that the births among them numbered 34, and that the deaths registered were 757,

119. The marriage-rate, calculated on the mean population of the colored races, was 1.21 persons married. The birth-rate was 1.78, and the death-rate was 39.66.

120. *Mortality of Polynesians.*—The number of deaths among the South Sea Islanders during the year 1882 was 674. The number of these in the colony in the middle of the year was estimated at 8,156. Mortality of Polynesians.

121. This gives a death-rate among them of 82.64 per thousand.

122. The death-rates among the Polynesians for eight years from 1875 to 1882 were as follows:—

| | Per 1,000 living. | | | |
|------|-------------------|-----|-----|-------|
| 1875 | ... | ... | ... | 85.11 |
| 1876 | ... | ... | ... | 63.6 |
| 1877 | ... | ... | ... | 57.39 |
| 1878 | ... | ... | ... | 85.18 |
| 1879 | ... | ... | ... | 55.78 |
| 1880 | ... | ... | ... | 62.89 |
| 1881 | ... | ... | ... | 64.74 |
| 1882 | ... | ... | ... | 82.64 |

123. The bulk of the Islanders are of ages between 15 and 35. This was ascertained by the Census of 1881, by which it is seen that 47 only were below 15 years of age, and 140 only were over 35, those between those ages numbering 4,397.* For this purpose, therefore, the whole may be taken as between 15 and 35 years of age. The deaths of persons between 15 and 35 in the Census year, exclusive of Islanders, numbered 384, their whole number being 68,621; the death-rate was 5.60 per thousand only, while it is seen that the death-rate among Polynesians was 64.74 per thousand.

MORTALITY OF CHILDREN.

124. *Infantile Mortality.*—The deaths of children under twelve months in 1882 has been 1,188. Infantile mortality.

125. What is called infantile mortality, or the deaths of children under one year in proportion to the number of births, has been 13.95 per cent. This is greater than it was in either of the three years preceding that of 1882. Rate.

126. The average infantile mortality for the ten years—1873 to 1882—has been 13.24. This is shown in the following table:— Average.

Q.

SHOWING REAL INFANT MORTALITY.—RETURN FOR TEN YEARS—1873-1882.

| 1873. | 1874. | 1875. | 1876. | 1877. | 1878. | 1879. | 1880. | 1881. | 1882. | Average annual No. of Deaths under 1 year per 100 Births. |
|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|---|
| 12.25 | 12.15 | 15.28 | 14.40 | 14.76 | 16.68 | 11.65 | 10.55 | 11.17 | 13.95 | 13.24 |

127. Of the children dying under twelve months old, 364, or nearly 31 per cent., died in the first month of life; 210, or nearly 18 per cent., over 1 and under 3 months old; 261, a little over 21 per cent., 3 and under 6 months old; and 353, or nearly 30 per cent., 6 and under 12 months old.

128. Infantile mortality in the other colonies is given in the "Victorian Year Book," the mean of 15 years ending 1880, as follows:— In the Australian Colonies.

| | | | | |
|-----------------|-----|-----|-----|-------|
| New Zealand | ... | ... | ... | 9.93 |
| Tasmania | ... | ... | ... | 10.31 |
| New South Wales | ... | ... | ... | 10.83 |
| Victoria | ... | ... | ... | 12.40 |
| Queensland | ... | ... | ... | 12.90 |
| South Australia | ... | ... | ... | 15.06 |

* See Table CXXI., Queensland Census Report and Tables 1881, page 236.

Proportion to total deaths.

129. The proportion of children dying under twelve months old during the year in Queensland has been 27·80 per cent. of the total deaths.

Mortality among children and adults.

130. There is considerable fluctuation in what is called infantile mortality in England and Wales. In the Report of the Registrar-General for 1879 reference is made to a decreased proportion of deaths of children in that year, and it has been contended that the saving of life effected by the operation of the science of sanitation seems likely to take effect only in lessening the death-rate of children. But the Registrar-General shows, on the contrary, that though advanced sanitation may have its chief operation in the preservation of young lives, it must also act directly in lessening the death-rate among adults; for, if sanitation preserves a number of sickly children from death, and so adds a proportion of weakly persons to the adult population, it also makes strong men and women of those who would otherwise have suffered from a weakly constitution, and would be likely to die in comparatively early periods of adult life. These remarks were in connection with the fact that the mortality of persons in middle or advanced life had been steadily rising for some years, while the death-rate of children had diminished.

131. In the Report of the Registrar-General, the last received, for 1880 it is seen that in that year “the mortality of children was in excess, while that of persons above the age of childhood was below the average, and this to such an extent as largely to over-balance the increased mortality of children;” the general death-rate in the year having been the lowest recorded since civil registration began, excepting only in 1877. In that year the death-rate in England and Wales was 20·3, and in the year 1880 it was 20·5 per thousand. The great mortality of children was, however, chiefly attributable to the prevalence of diarrhœa and measles.

Children under five years.

132. *Mortality of Children under Five Years of Age.*—Reference has been made to an impression which exists that the Australian climate, or mode of life, was unfavorable to the lives of children, but it should always be borne in mind that any correct comparison of the mortality of children in different places must be based upon the number of children living in those places and at the ages under consideration. Comparisons made of deaths of children under five years, as measured by the whole population, appear unfavorable to Queensland, but when tried by the true test, that is by the number of children living under five years in any census period, when the numbers at the ages are actually ascertained, this shows favorably to the colony, both as compared to England and Victoria. Thus in the census year of 1876 the figures were as follows:—

Proportion of Deaths of Children under Five Years per thousand of Children living under Five Years.

| | | | | | | | |
|-------------------|-----|-----|-----|-----|-----|-----|------|
| England and Wales | ... | ... | ... | ... | ... | ... | 66·9 |
| Victoria | ... | ... | ... | ... | ... | ... | 55·9 |
| Queensland | ... | ... | ... | ... | ... | ... | 55·7 |

Proportion of deaths of children under five years to number living in Queensland in census year.

133. In the census year of 1881 there were 31,934 children living in Queensland under 5 years of age; the number of deaths of children under 5 years was 1,347, and the proportion of deaths of such children to the number living was 42·18 per thousand.

In Victoria, mean for ten years ending 1881.

134. The “Victorian Year-Book,” 1881-2, shows that the mean number of children living under 5 years in the decennium of 1871-1881, was 115,446. The deaths of children under 5 years, the mean for the same period, are given as 5,102; the proportion of deaths of such children to the number living was 44·19.

In England and Wales in 1880.

135. The mortality of children under 5 years in England and Wales in 1880, as shown in the last report received, was 64·4 per thousand of persons living at that age.

136. The

136. The comparison will be plainly seen as follows :—

Proportion of Deaths of
Children under Five Years per
thousand of Children living
under Five Years.

| | | | | | |
|---|-----|-----|-----|-----|-------|
| Queensland, 1881, census year | ... | ... | ... | ... | 42.18 |
| Victoria, 1871 to 1881, mean of ten years | ... | ... | ... | ... | 44.19 |
| England and Wales, 1880 | ... | ... | ... | ... | 64.04 |

137. *Mortality in Towns.*—The healthfulness or otherwise of any locality is under ordinary circumstances fairly tested by the mortality of children. The following tables show the mortality of children from one month to five years in the metropolitan district of Brisbane and in the country districts in Queensland in the year 1882 :—

R.

SHOWING MORTALITY OF CHILDREN FROM ONE MONTH TO FIVE YEARS in the METROPOLITAN and COUNTRY DISTRICTS, 1882.

| District and Sex. | Total Number of Deaths in 1882. | Deaths of Children under One Year. | | | | | Totals and percentages under 1 year. | | | Totals and percentages under 2 years. | | | Totals and percentages under 5 years. | | |
|-------------------------|---------------------------------|------------------------------------|-------------------------------|--------------------------------|----------------------------------|---------------------------------|--------------------------------------|--|--|---------------------------------------|--|--|---------------------------------------|--|--|
| | | Under 1 month. | One month and under 2 months. | Two months and under 3 months. | Three months and under 6 months. | Six months and under 12 months. | Total Deaths under 1 year. | Per-centage to total Deaths in the District. | Per-centage to total Deaths in the Colony. | Total Deaths under 2 years. | Per-centage to total Deaths in the District. | Per-centage to total Deaths in the Colony. | Total Deaths under 5 years. | Per-centage to total Deaths in the District. | Per-centage to total Deaths in the Colony. |
| Brisbane Dis- trict— | | | | | | | | | | | | | | | |
| Males ... | 466 | 34 | 18 | 19 | 40 | 49 | 160 | 34.33 | 5.68 | 205 | 43.99 | 7.28 | 227 | 48.71 | 8.06 |
| Females ... | 366 | 37 | 14 | 10 | 37 | 39 | 137 | 37.43 | 9.40 | 187 | 51.05 | 12.83 | 213 | 58.20 | 14.62 |
| Total ... | 832 | 71 | 32 | 29 | 77 | 88 | 297 | 35.70 | 6.95 | 392 | 47.12 | 9.17 | 440 | 52.88 | 10.29 |
| Country Dis- tricts— | | | | | | | | | | | | | | | |
| Males ... | 2,351 | 154 | 57 | 33 | 107 | 135 | 486 | 20.67 | 17.25 | 623 | 26.50 | 22.12 | 721 | 30.67 | 25.59 |
| Females ... | 1,091 | 139 | 28 | 31 | 77 | 130 | 405 | 37.12 | 27.80 | 547 | 50.14 | 37.54 | 626 | 57.38 | 42.96 |
| Total ... | 3,442 | 293 | 85 | 64 | 184 | 265 | 891 | 25.89 | 20.85 | 1,170 | 33.99 | 27.37 | 1,347 | 39.13 | 31.52 |
| Grand Total | 4,274 | 364 | 117 | 93 | 261 | 353 | 1,188 | ... | 27.80 | 1,562 | ... | 36.55 | 1,787 | ... | 41.81 |

138. It will be seen that in the Brisbane district the children dying under five years were in the proportion of 52.88 to the total deaths in the district, while in the colony, including all places outside and within the metropolitan district, they were in the proportion of only 41.81. The number of children living in the registry district cannot at present be ascertained so as to give the ratio of deaths as compared to the number of children living. The general death-rate, as compared to mean population of town and country, fairly shows the relative salubrity or otherwise of the different places in the colony and of towns to country districts.

139. The death-rates in the chief towns in Queensland in the census year of 1881 were as follows* :—

| | 1881. |
|---------------------------------------|-------|
| Mackay ... | 27.95 |
| Charters Towers ... | 27.31 |
| Bundaberg ... | 24.33 |
| Maryborough ... | 21.74 |
| Warwick ... | 21.69 |
| Rockhampton ... | 20.32 |
| Cooktown ... | 20.09 |
| Roma ... | 19.59 |
| Brisbane Municipality and Suburbs ... | 19.48 |
| Toowoomba ... | 17.48 |
| Townsville ... | 16.82 |
| Ipswich ... | 16.49 |
| Brisbane Municipality ... | 16.43 |
| Gympie ... | 15.12 |
| Dalby ... | 13.12 |

* The estimates of population received from the municipal authorities are generally much in excess of the number as actually found by the Census enumeration, and for the future it is intended to give death-rates in towns only in census years.

140. In the *towns* of Mackay, Bundaberg, and Maryborough the death-rate is swelled by the presence of many Polynesians. In the registry *district* of Mackay in the Census year of 1881, when the population was ascertained, the death-rate was 43·24 per thousand of mean population inclusive, and 22·22 per thousand exclusive, of Polynesians. In the district of Bundaberg it was 24·36 inclusive and 14·46 exclusive. In the Maryborough district the death-rate was 21·90 per thousand of mean population inclusive, and 14·20 per thousand exclusive, of Polynesians.

Deaths in towns
and in country.

141. The number of deaths and the death-rate in the larger towns collectively, and in the remainder of the colony in the Census year of 1881, are seen as follows:—

| | | Death-rate per thousand of Mean Population. |
|---|--------------|--|
| Number of deaths in larger towns | 1,513 | 19·54 |
| Number of deaths, exclusive of larger towns | 1,807 | 13·28 |

142. This comparison cannot be correctly made in any but the census year, because of the over-estimates generally made by the town authorities of the population; it cannot therefore be given with any near approach to exactness for the year 1882.

Death-rates in towns
and in country in
England and Wales.

143. In England and Wales the Registrar-General has given the death-rates in town and country for 1880 as follows:—Urban, 21·9; rural, 18·5.

144. The difference in England between town and country death-rates was 3·4 only, but in Queensland we see the difference was 6·26.

145. In this comparison of town and country it should be understood that only the larger towns in Queensland are included; if all the towns were shown separately from country the death-rate between urban and country would show a greater difference in favor of the country.

Death-rate in
Queensland towns
higher than that of
towns in England.

146. The death-rates in our larger towns in Queensland are considerably higher than those existing in the large towns in England and Wales, and this notwithstanding the salubrity of our climate and our general healthfulness. The average death-rate in Queensland on the whole population, including the colored races, is about 17, while in England and Wales it is about 21 per thousand; and the death-rates in our towns apart from Polynesian deaths should be proportionately lower than in the old country, instead of considerably higher.

Better sanitary
arrangements
required.

147. The condition of our towns points to the necessity of drainage, an abundant supply of pure water, the cleansing of our streets, and a thorough system of removing and deodorizing all offensive matter. The great saving of life effected during the last twenty years in England and Wales by the operation of sanitary reform affords the surest evidence of the good that might be effected by a similar reform in the towns of Australia.

Health of Brisbane.

148. Looking now at the mortality in the metropolitan district of Brisbane, it will be seen that, as compared with the colony generally, Brisbane is not a healthy place. A great improvement has certainly been effected during the last five or six years, caused, no doubt, by the construction of main drains at a considerable cost; but much yet remains to be done in perfecting the system and in subsidiary drainage throughout the city.

149. The following table is a summary of the monthly Vital Statistics of Brisbane and its suburbs, prepared in this office, and published from time to time in the *Government Gazette*:—

S.

SUMMARY of Monthly Reports of Vital Statistics of Brisbane and Suburbs, showing the Death-rate in each month of the year 1882; the Annual Death-rate to which the rate each month is equal; the Death-rate in the Metropolitan District as compared to the Annual Death-rate of the colony; also the true Infantile Mortality, or Deaths of Children under one year, as compared to the Births, in the Registry District of Brisbane and in the whole of Queensland, and the Infantile Mortality for Ten Years, viz., from 1873 to 1882.

| Population—Brisbane Registry District—Municipal and Suburban. | | | Month. | Portion of Registry District. | Number of Deaths and percentage of Total Deaths to Population, also Mean Shade Temperature in the Brisbane Registry District during each Month of 1882. | | | | | | | Death-rate per 1,000 in the Brisbane District and the whole Colony in the year 1882, on the Mean Population. | | | | Infantile Mortality, or proportion of Deaths of Children under 1 year to total Births. | | | | | | | | Infantile Mortality for Ten Years in Queensland. | |

| Total Deaths in the Year | | | | | ... | 832 | | | | | | | | | | | | | | | | | | | 13·24 |

* Census Population, 1881.—The percentages were calculated on this population for the first six months of the year.

† Population as estimated to the 1st January, 1882.—During the last six months of the year the percentages were calculated on this population, which had then been ascertained for the Annual Statistics for 1881.

‡ These percentages are calculated on the Mean Population for 1882 estimated after the close of the year, as follows:—Municipal portion, 25,418; Suburban portion, 9,200; the whole District, 34,618.

Death-rates in
Brisbane district,
municipality and
suburbs.

Seasons of the year—
mortality.

150. The figures in one line, in the centre of the table, show the death-rates in the whole of Queensland, in the whole district of Brisbane, in the municipality and in the suburbs.

151. It will be seen that while in the whole colony the death-rate in 1882 was 17·99, that in the Brisbane district it was 24·03. In the municipality it was 20·30, and in the suburban parts of Brisbane it was no less than 34·35.

152. The very high death-rate in the suburbs is perhaps accounted for by more imperfect drainage in the suburban locality, and, no doubt, in some measure by the fact that many families now live in the suburbs, where there is a larger proportion of children.

153. It should be borne in mind that there are few Polynesians to swell the death-rate in Brisbane, and that the considerable mortality there is almost exclusively among the European and Australian born population.

154. *Seasons of the Year.*—The greatest number of deaths in the whole of Queensland during the year occurred in the quarter ending March, when there were 1,205 deaths registered; the next highest number was in the last quarter of the year, showing 1,089 deaths; in the second quarter there were 1,038 deaths recorded; and in the third quarter the number of deaths was 942.

155. In the Brisbane registry district, as shown in table S, the deaths were as follows :—

| | | | | | |
|---------------|-----|-----|-----|-----|-----|
| December ... | ... | ... | ... | ... | 109 |
| November ... | ... | ... | ... | ... | 106 |
| October ... | ... | ... | ... | ... | 99 |
| May ... | ... | ... | ... | ... | 78 |
| January ... | ... | ... | ... | ... | 65 |
| March ... | ... | ... | ... | ... | 63 |
| February ... | ... | ... | ... | ... | 59 |
| September ... | ... | ... | ... | ... | 56 |
| June ... | ... | ... | ... | ... | 54 |
| April ... | ... | ... | ... | ... | 48 |
| July ... | ... | ... | ... | ... | 48 |
| August ... | ... | ... | ... | ... | 47 |
| Total | ... | ... | ... | ... | 832 |

156. It will be seen that in the three months October, November, and December, the number was more than double that in the three months April, July, and August.

157. The following table shows the total number of births, marriages, and deaths, and their proportion, including Chinese and Polynesians, to every thousand of the mean population, in the metropolian district of Brisbane, in the remainder of the colony classed as country, and in the whole colony :—

T.

Showing BIRTHS, MARRIAGES, and DEATHS for 1882, and the proportion to every 1,000 of the Mean Population.

| District. | Estimated Mean Population. | TOTAL NUMBER. | | | PROPORTION TO EVERY 1,000 OF THE MEAN POPULATION.* | | |
|------------------------------|----------------------------------|---------------|------------|---------|---|------------|---------|
| | | Births. | Marriages. | Deaths. | Births. | Marriages. | Deaths. |
| Municipality of Brisbane ... | 25,418 | 1,067 | 494 | 516 | 41·98 | 19·44 | 20·30 |
| Suburban ... | 9,200 | 376 | 38 | 316 | 40·87 | 4·13 | 34·35 |
| Metropolitan District ... | 34,618 | 1,443 | 532 | 832 | 41·68 | 15·37 | 24·03 |
| Country ... | 202,993 | 7,075 | 1,502 | 3,442 | 34·85 | 7·40 | 16·96 |
| Total Colony ... | 237,611 | 8,518 | 2,034 | 4,274 | 35·85 | 8·56 | 17·99 |

* These rates include Polynesians; for true rates, exclusive of Polynesians, see Table P in the body of the Report.

158. *Deaths in Public Institutions.*—There have been 157 deaths in the public institutions in Brisbane during the year. Many of the deaths thus occurring were of persons usually resident in the town, and there is no ground for the commonly received impression that our Brisbane death-rate is swelled to any appreciable extent by the deaths of persons from the country. The number and the sexes will appear as follows :—

| | Males. | Females. | Total. |
|--------------------------------|--------|----------|--------|
| General Hospital | 90 | 47 | 137 |
| Lady Bowen Hospital | 0 | 2 | 2 |
| Children's Hospital | 1 | 2 | 3 |
| Diamantina Orphanage | 1 | 1 | 2 |
| Infants' Asylum | 6 | 3 | 9 |
| Lunatic Reception House | 1 | 0 | 1 |
| Lock Hospital | 0 | 0 | 0 |
| Brisbane Gaol | 3 | 0 | 3 |
| Immigration Depôt | 0 | 0 | 0 |
| Fortitude Valley Gaol | 0 | 0 | 0 |
| Convalescent Home | 0 | 0 | 0 |
| Total | 102 | 55 | 157 |

159. *Marine Births and Deaths.*—The following table shows the births and deaths which have occurred during the year in vessels arriving in the colony :—

U.

MARINE BIRTHS and DEATHS, 1882.

| Number of Vessels. | | ARRIVALS. | | | BIRTHS. | | | | DEATHS. | | | |
|--------------------|--|-----------|----------|----------|---------|----------|----------|-----------------------------|---------|----------|----------|-----------------------------|
| | | Males. | Females. | Persons. | Males. | Females. | Persons. | Rate per cent. of Arrivals. | Males. | Females. | Persons. | Rate per cent. of Arrivals. |
| 18 | <i>British Ships—</i> B. I. Co.'s Steam Ships carrying Immigrants | 4,077 | 3,189 | 7,266 | 13 | 16 | 29 | 0·40 | 45 | 32 | 77 | 1·06 |
| 15 | Immigrant Ships (Sailing Vessels) | 3,012 | 2,250 | 5,262 | 21 | 17 | 38 | 0·72 | 34 | 31 | 65 | 1·24 |
| 19 | Short Ships ... | 86 | 42 | 128 | 1 | ... | 1 | 0·78 | 2 | 1 | 3 | 2·34 |
| | Total ... | 7,175 | 5,481 | 12,656 | 35 | 33 | 68 | 0·54 | 81 | 64 | 145 | 1·15 |
| 33 | <i>Polynesian Ships—</i> Immigrant Vessels | 2,788 | 352 | 3,140 | ... | ... | ... | ... | 3 | ... | 3 | 0·10 |
| | | 9,963 | 5,833 | 15,796 | 35 | 33 | 68 | 0·43 | 84 | 64 | 148 | 0·94 |
| | Excess of Deaths over Births | | | | | | | | 49 | 31 | 80 | ... |

160. In British ships the total births have numbered 68, of which there were 29 on board the 18 steamers of the British-India Company coming *viâ* Torres Straits, and 39 in ordinary sailing vessels on the long sea route.

161. The total deaths in ships arriving from Great Britain numbered 145; of these 77 occurred in 18 steam vessels *viâ* Torres Straits, and 68 in sailing vessels.

162. In ships bringing Polynesians there were no births; the number of deaths in these vessels during the year was three.

CAUSES

CAUSES OF DEATH.

Causes of death.

163. The Registrar-General of England has for a number of years made use of Dr. Farr's arrangement of diseases in orders and classes, on a system which is considered especially adapted to exhibit those causes which tend to shorten life, and is therefore peculiarly valuable in the present advanced condition of sanitary science.

164. A most useful index for arranging all known causes of death under Dr. Farr's system of nosology was prepared some years since by the Government Statist of Victoria, Mr. H. H. Hayter, and this is now in general use in Australia.

Dr. Farr's arrangement of diseases in orders and classes.

165. Under Dr. Farr's system of nosology, diseases are arranged under five primary classes as follows:—

- I. *Zymotic* (Gr. *zymé*, leaven) diseases—epidemic, endemic, or contagious, induced by some specific body, or by insufficient or unwholesome food.
- II. *Constitutional* diseases—affecting several organs in which new morbid products are often deposited; sometimes hereditary.
- III. *Local* diseases—In which the functions of particular organs or systems are distributed or obliterated, with or without inflammation; sometimes hereditary.
- IV. *Delevelopmental* diseases—special diseases, the incidental result of the formative, reproductive, and nutritive processes.

To these are added the class coming under the head of *Violence*.

166. In Class I., *Zymotic*, there are four orders, as follows:—

1. *Miasmatic* (Gr. *miasma*, a stain), including small-pox, measles, scarlet fever, diphtheria, typhus, and typhoid fevers, cholera, ague, &c.
2. *Enthetic* (Gr. *enthetos*, put in, or implanted), as syphilis, gonorrhœa, glanders, hydrophobia, &c.
3. *Dietic* (Gr. *dieta*, way of life or diet), as fumes, scurvy, purpura, rickets, bronchocele, delirium tremens, &c.
4. *Parasitic*, as scabes and worm diseases, from animal parasites, ring-worm, scald-head, &c., from vegetable parasites or fungi.

167. In Class II., *Constitutional diseases*, the subdivisions or orders are—

1. *Diathetic* (Gr. *diathesis*, condition or constitution), as gout, anœmia, cancer, melanosis, lupus, &c.
2. *Tubercular*, such as scrofula, phthisis, &c.

168. Class III., *Local diseases* are divided into eight orders, as follows:—

1. *Brain diseases*, or, more correctly, diseases of the nervous system, as apoplexy, paralysis, epilepsy, chorea, hysteria, mania, &c.
2. *Heart diseases*, or diseases of the circulatory system, as pericarditis, endocarditis, aneurism, angina pectoris, phlebitis, &c.
3. *Lung diseases*, or, more correctly, diseases of the respiratory system, such as bronchitis, pneumonia, pleurisy, asthma, empyema, laryngitis, &c.
4. *Bowel diseases*, or diseases of the digestive system, as stomatitis, gastritis, enteritis, peritonitis, jaundice, &c.
5. *Kidney diseases*, as Bright's disease, nephritis, ischuria, diabetes, stone, gravel, &c.
6. *Gennetic diseases*, such as hydrocele, ovarian dropsy, &c.
7. *Bone and muscle diseases*, such as caries, necrosis, exostosis, &c.
8. *Skin diseases*, such as eczema, herpes, ichthyosis, acne, lichen, prurigo, &c.

169. Class IV., *Developmental*, has four orders, as

1. *Developmental diseases of children*, as malformation, idiocy, teething, &c.
2. *Developmental diseases of women*, such as amenorrhœa, childbirth, change of life, &c.
3. *Developmental diseases of old people*, such as old age and its concomitant affections.
4. *Diseases of nutrition*, such as atrophy, debility, &c.

170. Class

170. Class V., *Violence*. This is divided into five orders :

1. *Accident or negligence.*
2. *Wounds in Battle.*
3. *Homicide.*
4. *Suicide.*
5. *Execution.*

171. To these may be added Class VA., *Cause not defined* :

1. Cause not ascertained.
2. Cause ill-defined.
3. Cause unspecified.

172. The causes of death which have occurred in Queensland during the year 1882 will be found in full detail in Appendix A, in tables numbered 12 to 23.

173. *Phthisis*.—Including the deaths of Polynesians, the deaths from phthisis have been 404.* In 1881 the deaths from phthisis were 292. In the five years ending 1882 the deaths by phthisis have been :—

In proportion to total deaths for each ten thousand, 623·22, 876·21, 997·68, 879·52, 945·25.

In proportion to mean population for each ten thousand, 12·72, 13·12, 13·56, 13·21, 17·00.

The proportion to total deaths is much larger than usual, but something less than in the year 1870.

174. In the Australian Colonies the mean of deaths from this cause in the eight years ending 1880 is given as follows in the "Victorian Year Book" of 1881-2 :—

| | | | | | | | |
|-----------------|-----|-----|-----|-----|-----|-----|-------|
| New Zealand | ... | ... | ... | ... | ... | ... | 8·44 |
| South Australia | ... | ... | ... | ... | ... | ... | 9·84 |
| New South Wales | ... | ... | ... | ... | ... | ... | 10·18 |
| Tasmania | ... | ... | ... | ... | ... | ... | 10·25 |
| Queensland | ... | ... | ... | ... | ... | ... | 12·52 |
| Victoria | ... | ... | ... | ... | ... | ... | 13·10 |

175. In England and Wales the deaths from phthisis in the five years ending 1874 were in the proportion of 22·83 for each ten thousand persons living.

176. Attention has been called for several years, in these Reports on the Vital Statistics of Queensland, to the large number of Polynesians who die yearly in the colony from pulmonary consumption (quoted by Mr. Hayter in the "Victorian Year Book," 1881-2, foot-note page 239). It is shown that, exclusive of the Polynesians, the deaths from phthisis in 1881 were only in the proportion of 8·09 to ten thousand persons living.

177. In 1882 the number of deaths in Queensland from pulmonary consumption, exclusive of Polynesians, was 235; the mean population, exclusive of Polynesians, was 229,455; and the proportion of deaths from this disease was 10·24 per ten thousand persons living, taking the mean exclusive population.

178. It is believed that many persons come to Australia who are suffering from incipient consumption, for the benefit of the warm and dry atmosphere generally prevailing. This, no doubt, increases the deaths recorded from phthisis in this part of the world. The following table shows the length of residence in the Australian colonies, and the nationality of the 404 persons who died from pulmonary consumption in Queensland in 1882, excepting some whose nationality and length of residence were not ascertained.

* Exclusive of Polynesians, the deaths from phthisis during the year 1882 have been 235, or in the proportion of 6·53 to the total number of deaths in the colony, exclusive of Polynesians.

184. *Teething*—Class IV., Order 1.—The deaths recorded as occasioned by teething in the year were 151. In the five years the deaths from teething were :—
 In proportion to total deaths to each ten thousand, 298·60, 321·17, 255·22, 262·05, 353·30.
 In proportion to each ten thousand of mean population, 6·09, 4·81, 3·47, 3·94, 6·35.
185. *Fever, Typhoid*—Class I., Order 1.—The deaths registered as caused by typhoid fever in the year have been 150. In the five years the deaths from typhoid fever were :—
 In proportion to total deaths for each ten thousand, 466·82, 308·70, 149·15, 219·88, 350·96.
 In proportion to each ten thousand of mean population, 9·53, 4·62, 2·03, 3·30, 6·31.
186. *Drowning, Accidental*—Class V., Order 1.—The deaths from drowning during the year have numbered 132. In the five years there were :—
 In proportion to total deaths to each ten thousand, 187·20, 339·88, 331·46, 240·96, 308·84.
 In proportion to each ten thousand of mean population, 3·82, 5·09, 4·51, 3·62, 5·56.
187. *Bronchitis*—Class III., Order 3.—There have been 116 deaths from bronchitis during the year. In the five years the deaths from this cause were :—
 In proportion to total deaths for each ten thousand, 128·46, 168·38, 281·74, 174·70, 271·41.
 In proportion to each ten thousand of mean population, 3·72, 2·52, 3·83, 2·62, 4·88.
188. *Apoplexy*—Class III., Order 1.—The deaths as recorded from this cause during the year have been 46. In the five years the deaths from apoplexy have been :—
 In proportion to total deaths for each ten thousand, 104·27, 134·08, 119·32, 177·71, 107·63.
 In proportion to each ten thousand of mean population, 2·13, 2·01, 1·62, 2·67, 1·94.
189. *Childbirth*—Class IV., Order 2.—Deaths from parturition in the year have numbered 41. This is in the proportion of one to each 208 births. In the five years the deaths from this cause were :—
 In proportion to total deaths for each ten thousand, 87·68, 93·55, 122·64, 111·45, 95·93.
 In proportion to each ten thousand of mean population, 1·79, 1·40, 1·67, 1·67, 1·73.
190. *Measles*—Class I., Order 1.—The deaths from measles in the year were 32. There were 3 deaths from this cause in 1881, and in the previous year it had not made its appearance.
191. *Diphtheria*—Class I., Order 1.—The deaths from this cause during the year have been 29. In the five years the deaths from diphtheria were :—
 In proportion to total deaths for each ten thousand, 40·28, 77·95, 99·44, 84·34, 67·85.
 In proportion to each ten thousand of mean population, 0·82, 1·17, 1·35, 1·27, 1·22.
192. *Scarlatina*—Class I., Order I.—Two deaths occurred from this cause during the year. In 1881 one death only occurred from this cause. In the two former years, 1880 and 1879, there were no deaths recorded from scarlatina.
193. *Violence*—Class V.—There have been 439 deaths during the year which may be ascribed to violence, including deaths from sunstroke. Of these 380 were deaths from accidents, 6 were cases of manslaughter, 40 were suicides, 11 were murders, and 2 were executions.
194. *Accidental Deaths*—Class V., Order I.—Of these 132 were caused by drowning; 54 are put down to sunstroke; 19 resulted from falls from horses, 15 from suffocation, 15 from the falling of trees, 14 from poison (accidentally taken), 14 from falling of earth; 14 were killed by drays or other vehicles; 12 died from burns, 10 from scalds, 8 from traumatic tetanus, 7 from fractures or contusions, 6 from falls from heights, 5 from gunshot wounds, 5 from being overlain in bed, 5 from injuries at

at birth, 4 from kicks from horses; 4 were killed on railways, 4 from falls down mining shafts, 4 from running against trees, 4 by pieces of timber; 3 died from bites by reptiles, 3 by falls from drays or other vehicles; 3 were killed by blasts, 3 died from blood-poisoning; 2 died from falls down hatchways, 2 by falls of pulley-blocks, 2 from injury to spine, 2 from result of surgical operation; 1 died from a kick from a cow, 1 from cuts or stabs; 1 was killed by an alligator; 1 died from internal injury, and 1 was killed by lightning.

Suicide.

195. There have been 40 cases of death by suicide recorded in the year in Queensland. This is in the proportion of 1·70 to ten thousand persons living of mean population. It has been pointed out in the "Victorian Year Book" that suicides are more common in Victoria and Queensland than in any of the other colonies of Australasia. The mean proportion of these in 8 years in New Zealand was ·84 per ten thousand. In Victoria it was 1·23, and in Queensland 1·32. Mr. Hayter says that suicides are more common in Victoria than in the countries of Europe except Switzerland, and it appears they are more common in Queensland than in Victoria. There is force, however, in the remarks of the Statist of Victoria, to the effect that the exactness with which causes of deaths are recorded in some colonies may make it appear that suicides are more common, by comparison with other colonies, than is actually the case. It appears that suicide frequently occurs among the Chinese in Victoria.

Other deaths from violence.

196. Of the remainder of the deaths from violence, there were 6 cases of manslaughter, 11 murders (three of them having been perpetrated by blacks), and 2 executions, both of the sufferers being men.

197. The whole number of violent deaths has been in the proportion of 10·27 per cent. of the total number of deaths during the year in Queensland, and of 1·85 per thousand of the estimated mean population.

Deaths from some principal causes.

198. The number of deaths in the colony during the year 1882 from some of the principal causes, and their proportions, are seen in a tabulated form in the following table:—

W.

TABLE showing the NUMBER OF DEATHS from some of the principal Causes; also their Proportion per 10,000 of the TOTAL DEATHS and MEAN POPULATION respectively for each of the YEARS 1878-82.—RETURN for FIVE YEARS, arranged in the order of their Degree of Fatality for 1882.

| Most Common Causes of Death. | 1878. | | | 1879. | | | 1880. | | | 1881. | | | 1882. | | |

100·00

200. Diseases of the miasmatic order of the zymotic class have been somewhat more prevalent in Queensland during the past year than in the former year. In the year 1881 they were in the proportion of 24·07 to the other causes of death; in the past year, 1882, the ratio of miasmatic diseases was 25·55.

Miasmatic order of zymotic diseases.

201. Diseases

Mostly preventable.

201. Diseases of the miasmatic order of class I. are often spoken of as preventable diseases, because they are, most of them, under control and can be lessened, or sometimes entirely cast out of communities, by cleanliness, good food, pure water, and fresh air.

More prevalent in Australian towns than in those of England and Wales.

202. Unhappily these diseases are much more prevalent in Australian towns than in those of England and Wales. This is in spite of the acknowledged healthfulness of the Australian climate, and is accounted for by the general neglect of sanitation in our towns.

203. The number of deaths in Queensland from these miasmatic diseases in the ten years, 1871 to 1880, was 8,253; but had the rate from these preventable diseases been the same as in England and Wales during the same period, the deaths from these causes would have been only 5,521—that is, a saving of 2,732 human lives would have thus been effected.

Estimated money—value of human life.

204. Some statisticians tell us that the value of a laboring man to the State over the cost of his maintenance is £175; other eminent authorities have put it much higher. In the United States of America it appears to be generally estimated at £200, while the distinguished medical statistician, Dr. William Farr, says that, proceeding upon the value of earnings and cost of maintenance at certain ages, he found that the child at birth was worth £5, at 5 years old £56, at 10 years £117, at 15 years £192; the young man of 20 is worth £234; while the man at 25 he values, say “a Norfolk agricultural laborer,” at £246.

205. On a similar calculation, supposing each family to average five persons, alternate males and females, the latter being estimated at half the value of the males, we may estimate each person at £104—say, male infant, £5; girl five years, £28; boy ten years, £117; father, £246; mother, £123—total, £519; average of five persons, about £104 each person.

206. The saving of the lives of 2,732 persons as above shown in the ten years would have thus represented a money value of £284,128.

207. This is the very lowest view of the question; but in this mere commercial sense it is of considerable importance in a country like Australia, where the money value of lives is really much greater than in the old countries of Europe; and this is especially true in Queensland, where our importation of 14,000 persons from Europe during the last year at an expenditure of, say, £16 a head for mere passages, amounting to an outlay of £224,000, does not more than meet the present year's requirements of the precious commodity of labour.

208. In England, where the excess of emigration over immigration for the past year has reached to about 1,000 a day* during the year, this aspect of the question would appear to possess little significance; indeed, we may easily imagine that among the most enthusiastic attendants at a social science congress such a cold-blooded view of the value of human life would excite some degree of horror. But the higher aspect of the question we have purposely omitted, because the evil and the remedy appear to be a mere matter of money-cost. Sanitary science is so far advanced that we may say, almost with as much certainty as a skilled actuary can form an expectation-of-life table for the guidance of a life insurance company, how much money it will cost to lessen the death-rate in any of the large towns in England or Australia so as to save a few thousands of lives.

209. What can be effected in the conservation of human life is now removed altogether from the region of conjecture, or mere scientific theorizing, and is certainly ascertained by what has been actually accomplished in our own country in the saving of lives by the application of the principles of sound sanitary measures in most of the great centres of population.

210. The Registrar-General of England, referring to the considerably reduced death-rate in England and Wales during the last quarter of a century, distinctly states that “this reduction is chiefly due to the improved sanitary condition of the urban districts.” He further shows that the reduction of the death-rates during the twenty-three and a-half years had been equal to one-eighth, or $12\frac{1}{2}$ per cent.†

I have the honor to be, Sir,

Your most obedient Servant,

HENRY JORDAN,

Registrar-General.

June 13th, 1883.

* See Report on British Emigration recently received from the Board of Trade in London.

† See Report of the Registrar-General of England for 1877, page XXIII.

GENERAL SCHEME OF CLASSIFICATION.

Class No. I.—ZYMOTIC DISEASES.

ORDER No. 1.—MIASMATIC DISEASES.

1. Small-pox.
- 1A. Chicken-pox.
2. Measles.
3. Scarlatina.
- 3A. Diphtheria.
4. Quinsy.
5. Croup.
6. Whooping Cough.
7. Fevers { Typhus.
Typhoid.
Infantile.
8. Erysipelas.
9. Metria.
10. Carbuncle, Boil, &c.
11. Influenza, Coryza, Catarrh.
12. Dysentery.
13. Diarrhoea.
14. Cholera.
15. Ague.
16. Remittent Fever, Fever, &c.
17. Rheumatism.
18. Others.

ORDER No. 2.—ENTHETIC DISEASES.

1. Syphilis.
2. Gonorrhoea, Stricture of the Urethra.
3. Hydrophobia.
4. Glanders.
5. Others.

ORDER No. 3.—DIETIC DISEASES.

1. Privation.
2. Want of Breast-milk.
3. Purpura and Scurvy.
4. Alcoholism { a Delirium Tremens.
b Intemperance.
5. Others.

ORDER No. 4.—PARASITIC DISEASES.

1. Thrush.
2. Worms.
- 2A. Hydatid.
3. Others.

Class No. 2.—CONSTITUTIONAL DISEASES.

ORDER No. 1.—DIATHETIC DISEASES.

1. Gout.
2. Dropsy.
3. Cancer.
- 3A. Tumor.
- 3B. Polypus.
4. Noma.
5. Mortification.
6. Others.

ORDER No. 2.—TUBERCULAR DISEASES.

1. Scrofula.
2. Tabes Mesenterica.
3. Phthisis.
- 3A. Hæmoptysis.
4. Hydrocephalus.
5. Others.

Class No. 3.—LOCAL DISEASES.

ORDER No. 1.—DISEASES OF THE NERVOUS SYSTEM.

1. Cephalitis.
2. Apoplexy.
3. Paralysis.
4. Insanity.
5. Chorea.
6. Epilepsy.
7. Convulsions.
8. Brain Disease, &c.

LOCAL DISEASES—continued.

ORDER No. 2.—DISEASES OF THE ORGANS OF CIRCULATION.

1. Pericarditis.
2. Aneurism.
3. Heart Disease, &c.

ORDER No. 3.—DISEASES OF THE RESPIRATORY SYSTEM.

1. Laryngitis.
2. Bronchitis.
3. Pleurisy.
4. Pneumonia.
- 4A. Congestion of the Lungs, Pulmonary Apoplexy.
5. Asthma.
6. Lung Disease, &c.

ORDER No. 4.—DISEASES OF THE DIGESTIVE ORGANS.

1. Gastritis.
2. Enteritis.
3. Peritonitis.
4. Ascites.
5. Ulceration of the Intestines.
6. Hernia.
7. Ileus.
8. Intussusception.
9. Stricture of Intestines.
10. Fistula.
11. Stomach Disease, &c.
12. Pancreas Disease, &c.
13. Hepatitis.
14. Jaundice.
15. Liver Disease, &c.
16. Spleen Disease, &c.

ORDER No. 5.—DISEASES OF THE URINARY ORGANS.

1. Nephritis.
2. Ischuria.
3. Nephria.
4. Diabetes.
5. Stone.
6. Cystitis.
7. Kidney Disease, &c.

ORDER No. 6.—DISEASES OF THE ORGANS OF GENERATION.

1. Ovarian Dropsy.
2. Uterus Disease, &c.

ORDER No. 7.—DISEASES OF JOINTS AND BONES.

1. Arthritis.
- 1A. Ostitis, Periostitis, &c.
2. Joint Disease, &c.

ORDER No. 8.—DISEASES OF THE INTEGUMENTARY SYSTEM.

1. Phlegmon.
2. Ulcer.
3. Skin Disease, &c.

Class No. 4.—DEVELOPMENTAL DISEASES.

ORDER No. 1.—DEVELOPMENTAL DISEASES OF CHILDREN.

1. Premature Birth.
2. Cyanosis.
3. Spina Bifida.
4. Other Malformations.
5. Teething.
6. Others.

ORDER No. 2.—DEVELOPMENTAL DISEASES OF ADULTS.

1. Paramenia.
2. Childbirth.
3. Others.

LEVELOPMENTAL DISEASES — continued.

ORDER No. 3.—DEVELOPMENTAL DISEASES OF OLD PEOPLE.

1. Old Age.
2. Senile Decay.

ORDER No. 4.—DEVELOPMENTAL DISEASES OF NUTRITION.

1. Atrophy.
2. Debility.

Class No. 5.—VIOLENCE.

ORDER No. 1.—ACCIDENT OR NEGLIGENCE.

1. Fractures, Contusions, &c.
 2. Gunshot Wounds.
 3. Cuts, Stabs, &c.
 4. Burns.
 5. Scalds.
 6. Sunstroke.
 7. Poison.
 8. Bite of a snake or poisonous insect.
 9. Drowning.
 10. Suffocation.
 - 11.
 - 12.
 - 13.
 - 14.
 - 15.
 - 16.
 - 17.
 - 18.
- Other Accidents as certified.

ORDER No. 2.—WOUNDS IN BATTLE.

1. Gunshot and Others.
2. Sword or Bayonet.
3. Others.

ORDER No. 3.—HOMICIDE.

1. Murder. { A by Whites.
B by Blacks.
2. Manslaughter.

ORDER No. 4.—SUICIDE.

1. Gunshot Wounds.
2. Cuts, Stabs, &c.
3. Poison.
4. Drowning.
5. Hanging.
6. Otherwise.

ORDER No. 5.—EXECUTION.

1. Hanging.

Class No. 5a.—CAUSE NOT DEFINED.

No. 1.—DEATHS, CAUSE NOT ASCERTAINED.

1. Found Dead.
2. Sudden Death.

No. 2.—DEATHS, CAUSE ILL-DEFINED.

1. Accidental Death.
2. Inflammation.
3. Natural Causes.
4. Visitation of God.
- 5.

No. 3.—DEATHS UNSPECIFIED.

1. Unspecified.

DEATHS, THEIR PROPORTION TO MEAN POPULATION, THEIR ANNUAL, NUMERICAL, AND CENTESIMAL INCREASE.

INFANTILE MORTALITY, AND ITS PROPORTION TO MEAN POPULATION, ITS INCREASE OR DECREASE, NUMERICAL AND CENTESIMAL.

MARRIAGES, THEIR INCREASE OR DECREASE, NUMERICAL AND CENTESIMAL, AND THEIR PROPORTION TO MEAN POPULATION OF EACH YEAR.

CHURCH, OR REGISTRY OFFICE.

* This estimate exceeded the Population, as ascertained by the Census taken on 3rd April, 1881, by 8,891 Males, 3,661 Females, or 12,552 Persons; the estimate has therefore been corrected by taking the Census Population with 13 per cent. added for non-collection as the basis, and deducting therefrom the increase by excess of Births over Deaths and excess of Arrivals over Departures by Sea between the 1st January and 3rd of April, 1881, which gives the corrected estimate marked †.

Table No. I.
